Modular, practical and poetic ensemble for the floor

A **livingstones** range for outdoor use appears in 2006. Made of neoprene, decorated with polysilicon fibres for the cushions and in waterproof polyurethane for the seating. Top of the range French manufacture allows them to be used indoor and out, in the garden, at poolside and on the terrace.

The palette of shades, choice of shapes and sizes is vast and variable : they enable you to imagine and create an infinite landscape. Maintaining our products is straight-forward: they are easily cleaned with soap and water.

All of the models in this range are available with or without lines: the lines' color is defined by the designer related to the shade of the **livingstones**.

As with all outdoor furniture, you are advised to think of protecting it from the weather to guarantee its longest possible use.

Floor cushions, to create a soft beach, are named after a boy: edgar, christophe, marc...

Seats, such as pouffes, sofas or ricochets, are named after a girl: enza, carla, emma,...
