Land

Designer Sergio Bicego
Produzione / Production year: 2025

Descrizione

Riappropriarsi della terra, sentirsi accolti in volumi che danno protezione, questa è stata l'ispirazione che ha guidato la creazione di Land.

La cifra stilistica si coglie nella base imbottita che poggia sulla cornice in metallo e si evolve nel disegno dei pannelli schienale, ora intrecciati con spiccato senso sartoriale.

Land conserva la sua natura nomade grazie alla flessibilità offerta dal sistema di aggancio dei pannelli schienale, che consente di cambiare agevolmente la posizione di seduta.

La sua spiccata personalità lo rende protagonista sia quando è elemento singolo sia quando è sistema modulare.

I singoli pannelli schienale si possono riorganizzare in modo intuitivo, per rispondere agevolmente alle esigenze del momento, reinventando la geografia dello spazio in modo personale e creativo.

A completare il progetto, i piani rimovibili sono utili appoggi in prossimità della seduta, inseribili su tutti e quattro i lati.

Struttura - Imbottitura

In legno imbottito con poliuretano espanso 30IP rivestito con velfodera accoppiata a fibra poliestere 150gr/mq. I supporti dei cuscini schiena, del cuscino bracciolo e del bracciolo rullo sono in metallo verniciato e a scelta possono essere rivestiti in tessuto o con fasce di tessuto accoppiato a pressato 300gr/mq.

I cuscini seduta sono imbottiti in poliuretano espanso a quote differenziate (40IP e memory), ricoperto da un materassino in fibra poliestere 100% rivestito con tessuto di cotone 100%.

I cuscini dello schienale e del bracciolo sono imbottiti in fibra poliestere 100% suddivisi in scomparti e rivestiti con tessuto di cotone bianco 100%.

Il bracciolo cilindro è imbottito con poliuretano espanso 30IP e rivestito con fodera in cotone accoppiato a fibra di poliestere 380gr/mq. Il cuscino bracciolo quadrato è imbottito in microfibra siliconata sfioccata 100% poliestere suddivisi in scomparti e rivestiti con tessuto di cotone bianco 100%.

Piedini

In tubolare d'acciaio verniciato h 3 cm.

Tavolino

In legno multistrato impiallacciato con bordi a taglio inclinato. L'ancoraggio con la base è garantito da una piastra metallica verniciata dotata di staffe.

Description

Reclaiming the floor and feeling welcomed in volumes that offer a sense of protection was the inspiration that guided the creation of Land.

The stylistic code can be noted in the padded base that rests on a metal frame and evolves in the design of the back panels, now intertwined with a strong sartorial touch.

Land retains its nomadic nature thanks to the flexibility offered by the backrest panel attachment system, which allows an easily changeable seating position.

Its strong personality makes it a protagonist both as a single element as well as a modular system.

The individual back panels can be intuitively rearranged to easily adapt to the needs of the moment, reinventing the geography of the space in a personal and creative way.

To complete the project, the removable side surfaces are useful supports near the seat, which can be inserted on all four sides.

Structure - Padding

In wood padded with polyurethane foam 30IP covered with velfodera coupled to 150gr/sqm polyester fibre. The supports of the back cushions, the arm cushion and the armrest roll are in painted metal and can be upholstered in fabric or with padded brided of fabric coupled to pressed strip 300gr/sqm.

Seat cushions are filled with variable-density polyurethane foam (40IP and memory), covered with 100% polyester fibre mattress clothed to 100% cotton fabric.

Back and arm cushions are filled with 100% polyester fiber divided into sections and covered with 100% white cotton fabric.

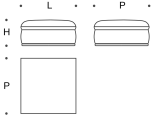

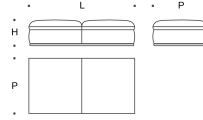

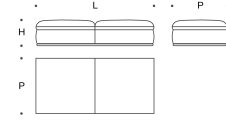

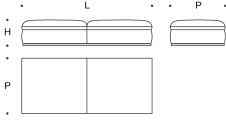

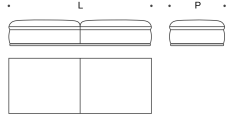

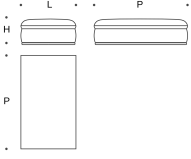

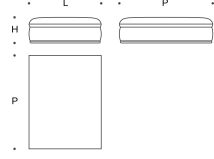

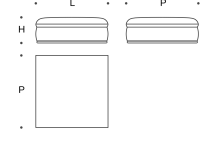

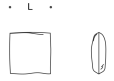

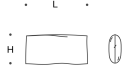

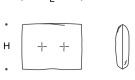

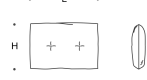

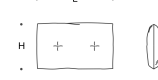

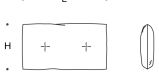

The roll armrest is filled with polyurethane foam 30IP and covered with cotton lining coupled with polyester fiber 380gr/sqm. The square armrest cushion is in siliconised microfiber unraveled 100% polyester quilted into sections and covered with 100% white cotton fabric.

Feet

In painted wire drawn steel h 3 cm.

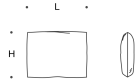

Low table

In veneered plywood with inclined cutting edges. Anchorage with base is guaranteed through painted metal plate equipped with brackets.
