Tibu by Anderssen & Voll

# Anderssen & Voll

## Profile:

Torbjørn Anderssen and Espen Voll were born respectively in Elverum, 1976 and in Trondheim, 1965. They both come from creative backgrounds: Torbjørn is the son of a musician and a teacher, and Espen the son of a ceramist and an architect. After graduating from the “Bergen Academy of Art and Design” and the “Oslo National Academy of Art”, they went on to cofound the design group Norway Says in 2000. Norway Says were forerunners in a growing international orientation amongst Norwegian designers – at the same time drawing international interest to Norway’s emerging young design scene. Norway Says had two particular crowning moments, with the “Söderbergs Award” in 2007, and a 10-year retrospective exhibition at the “National Museum of Art, Architecture and Design” in Oslo in 2009.

Anderssen & Voll was set up in 2009. Their work spans from textile design through tableware, lighting and furniture to electronics for some of Europe’s most renowned international brands. They have been absolute key in proposing what is known as “New Nordic”, through their contributions for companies including Muuto, Kvadrat, Erik Jørgensen, Wrong for Hay, Jøtul, Røros Tweed and LK Hjelle. Their work also resonates well with Italian brands such as Magis, Foscari and Lapalma. Working with the strongly contrasting industrial cultures to be found in the mountains of Norway and in the Venetian plains is a continuous source of inspiration, as are the liberating possibilities of large-scale industrial thinking. Torbjørn Anderssen teaches at the “Bergen Academy of Art and Design”.

# Design and

Tibu stool offers an extremely clean, essential, stylized design: the circular seat and footrest combine to form a single shape, echoed and reflected by the base and column below. The entire stool is in a single colour, but the materials used for the different parts vary according to their function: from the steel frame painted in polyester powder to the fabric and the polyurethane seat. Tibu is available with height-adjustment mechanism and comes in a vast range of colours, to match any taste and setting, at home or in the contract world.

## PRODUCT CARE

We recommend using a soft, either dry or wet, rag. When needed, use ph-balanced soap diluted in water. Do not use abrasive sponges as they may leave scratches. Never use undiluted cleaning agents, bleaching agents, ammonia or soap intended for hard surfaces. As a general rule, many types of stain can be removed using lukewarm water. For greasy stains, use a dry stain remover. For more insoluble stains (chewing gum, candle wax, etc.), use a plastic bag filled with ice to rub the stain until the substance has become friable.

Use a clean flat blunt blade to delicately remove the substance. Be careful when using solvents, because these could dissolve the upholstery material beneath. Avoid contact with all acidic substances. Avoid direct exposure to sunlight or heat sources. Periodic and correct maintenance allows the product to keep its original aspect and lengthens the duration of its performance.

## WARNING

ONLY SKILLED WORKERS ARE AUTHORISED TO REPLACE OR REPAIR THE COMPONENTS OF THE HEIGHT REGULATION SYSTEM. Treat stains immediately, the longer they remain in the fabric, the harder it is to remove them. Before choosing a cleaning method, always try it out on a concealed part of the seat. Do not use different cleaning products from the ones mentioned above. Do not use the product in an improper way. Do not place hot objects on it, stand on it or use the product as a ladder. Once disused, please make sure that this product is disposed in an environment-friendly way.
